

INTRODUCING TED

Arvieux, France - September 4, 2014

K-Devices announces the availability of a new max for live device: TED, an highly editable function generator with CV/Gate output.

TED allows you to modulate anything you want in Ableton Live: other devices, the user interface, and third party plug-ins, by complex waveforms and functions.

TED is composed of three main sections: an oscillator with 6 morphable waveforms, a sample and hold circuit, an effect section.

TED is also CV/Gate compatible, and it's the perfect tool to inject new modulation in Eurorack systems or other analogue devices.

TED support OSC, and a free Lemur template is available for free on K-Devices shop.

More info / audio / video at [this link](#).

System Requirements

Ableton Live 9.1.4 or higher - Max 6.1.8 or higher - Mac or PC

Availability and pricing

TED is available at the price of €5 at [this link](#).

About K-Devices

K-Devices is a company focused on developing Max For Live devices and more. It is composed of Alessio Santini and Simone Fabbri.
