

INTRODUCING AUTOBEAT

K-Devices announces the availability of AutoBeat, a **Max For Live beat editor** based on probabilities.

AutoBeat creates **evolving note patterns**, keeping the user to decide how the beat should play, instead of creating completely random beats.

Key features are included in this release:

- 8 step sequencers, set **chance** and **velocity** for each step;
- stunning **integration** with Ableton's **Drum Rack**;
- **fill generator** adds more variation introducing an alternative pattern;
- **store function** creates MIDI clips on the fly;

AutoBeat is perfect for creating **rhythmic** and **melodic** loops.

Everything is **designed to give the best experience** to the user.

No external Max objects are used in this device.

System Requirements: Ableton Live 9.0.1 or higher - Max For Live

Availability and pricing: AutoBeat is exclusively distributed by Ableton for **29€/39\$**. Product page on Ableton Packs Shop at this [link](#).
