

INTRODUCING DRUMK 2

K-Devices announces the immediate availability of Drumk 2, a **Max For Live device** for **advanced sample manipulation**.

New key features are included in this release:

- supports **2 samples** together: the user can interpolate amplitude between the two samples using the brand new **xfade** parameter;
- **redesigned graphical user interface**, in order to give to the user a **faster** and **better experience** while designing or manipulating sound in studio or during live performances;
- new amplitude envelope engine
- new time variation function: now user can use two different time resolution and “morph” them always being synced to Ableton Live;
- **store and recall** up to **8 snapshot** and morph them with the brand new **gesture** function;
- manage up to 4 external parameters from the Ableton Live graphical user interface or from any third party plugin hosted in Ableton Live.

Drumk 2 now gives a set of amazing tools to manipulate samples and interface them with Ableton Live parameters.

Everything is **designed to give the best experience** to the user.

No external Max objects are used in this device.

System Requirements: Ableton Live 8.3.4 or higher - Max version 5.1.9

Availability and pricing: Drumk 2 is available at the **price of € 24.99** at this [link](#).
