

INTRODUCING KFLUX BUNDLE

K-Devices announces the immediate availability of Kflux Bundle, a **Max For Live suite for granulation of sound**.

The bundle contains three amazing devices:

- **Kflux**: Max For Live **instrument** device for granulation of sound
- **Kfluxin**: Max For Live **audio effect** device for granulation of sound
- **Kfluxsy**: Max For Live **granulator synthesizer**

Kflux Bundle is designed to give the necessary tools for granulation of sound, taking advantage from the Max For Live integration: **parameters automation, freeze/bounce track functions, annotations** for each parameter in the Live's Info View.

Everything is **designed to give the best experience** to the user.

Kflux Bundle devices can produce a **wide range of sounds**: streams of grains, massive granular clouds, softy and noisy keys, complex textures, walls of noise, etc...

The Kflux Bundle devices come unlocked. No external Max objects are used in these devices.

More info / audio / video at this [link](#).

System Requirements: Ableton Live 8 or higher - Max For Live 2.2 - Mac and PC

Availability and pricing

Kflux Bundle (three devices) is available at the **special price** of **€19.99** at this [link](#).
